

*Escape into comfort. And savor the seasons.*

MORE OPTIONS  
THAN ANY OTHER  
SUNROOM

**NatureScape**<sup>®</sup>  
sunrooms

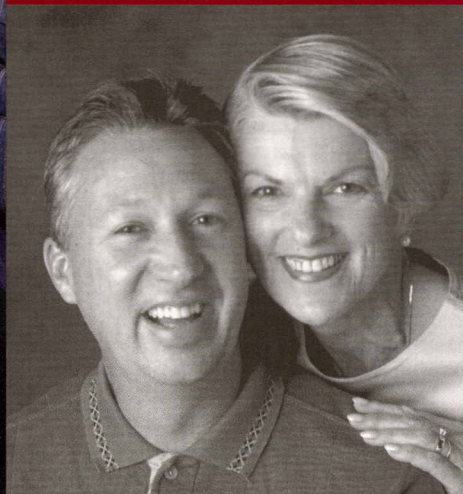

*Bring the best of the outside*

*inside.*

The NatureScape® sunroom is BOCA and ICBO evaluated to assure compliance with BOCA and ICBO national codes, an important advantage in expediting building permits.

Your NatureScape® sunroom offers more unobstructed view and ventilation than any other enclosure and the space you need for more enjoyable living, protected from insects and changes in weather. Relax in a hot tub, dine in the open air, entertain holiday guests, or just sit back and enjoy the evening breeze. Your room will complement the look of your home and add to its value. NatureScape® rooms are durable, virtually maintenance-free and backed by Elite's own product warranty.

NatureScape® also offers you more options for making this room your own. Because it's made for your home, your sunroom can be almost any size you choose. And any style – including extended-season, with virtually unlimited combinations of window and door options, colors, and roof styles.

*"It's so relaxing to sit in our NatureScape® room together. It is a bright and spacious place where we can get away from it all but still be at home year-round."*

Goshen, IN

THE  
NATURESCAPE®  
GLASS ROOM  
WITH  
EZE-BREEZE®  
SLIDING PANELS

*Let the breeze in. Keep*

Choose from a studio-style or gable-style roof (shown above) to complement the look of your home.

This combination has long been a favorite with homeowners. And rightly so. Eze-Breeze® sliding panels with unique vinyl glazing are a NatureScape® exclusive – custom-made to be installed floor to ceiling. They slide up or down easily to open up 75% of the window area for ventilation and views. When the weather cooperates, you'll have that breezy "screened porch" feeling. Yet, in seconds, these unique panels can be closed to give you protection from the elements.

Eze-Breeze® panels are weather-resistant, with durable aluminum frames. They can also be tinted to provide shade and gain privacy. Whether you're enclosing a hot tub or creating a private retreat, think Eze-Breeze® sliding panels. An unbeatable choice for comfort, enjoyment and affordability.

Panels glide up or down to open up 75% of the window area to the breeze. They also lift out for quick, easy cleaning.

Eze-Breeze® sliding panels' unique vinyl glazing makes them shatterproof. When hit, this tough material simply flexes and returns to its original form.

*Great for hot tubs!*

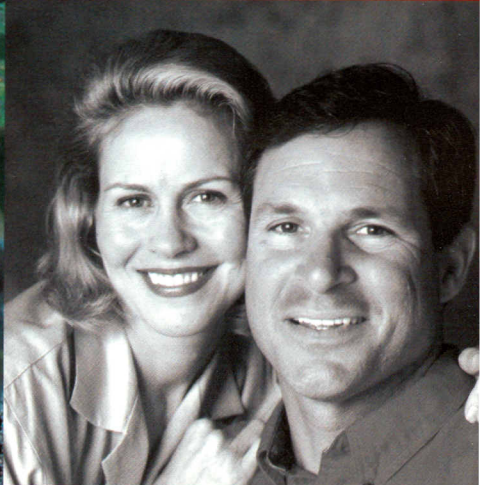

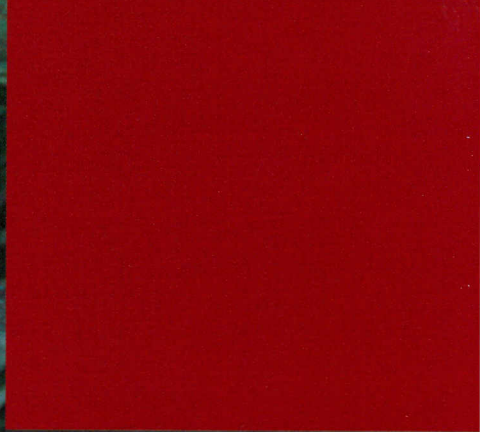

THE  
NATURESCAPE®  
GLASS ROOM

*An investment in enjoy*

Are you picturing a versatile, adaptable room that gives you space for hobbies, exercise equipment, open-air dining or watching TV? One that blends in beautifully with your home? Consider the NatureScape® glass room. You can choose from a wide variety of window styles – from single hung to horizontal rollers, and from French or sliding glass doors.

These durable aluminum windows and doors are the same high-quality products found in new home construction. They have interlocking meeting rails to prevent air and water infiltration. They also meet forced entry standards for home security, and they fit securely so they won't rattle with the wind. You can even enhance the comfort of your room with heat-reducing tints and low-E coatings. A lot of reasons why the NatureScape® glass room might be perfect for you.

*"We have been impressed by the quality of construction of our NatureScape® sunroom. It's solid, tight and blends in beautifully with our home."*

THE  
THERMALLY  
BROKEN  
NATURESCAPE®  
GLASS ROOM

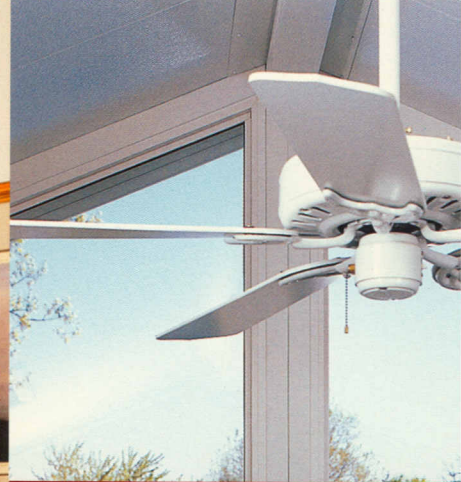

*More enjoyment more*

In addition to bringing the best of the outside in, this room keeps the worst of the outside out. Stay cool in the heat of summer and warm in the cold of winter. Extra-wide, three-inch thermally broken wall panels make heating and air conditioning an energy efficient proposition.

Durable, low-maintenance vinyl windows offer excellent thermal qualities. The well insulated frames and sashes combined with the double-paned insulated glass provide superior U-value and sound reduction compared to ordinary single-pane glass. You can choose from a variety of styles and high-performance glass options to make your NatureScape® room seem like an architect-designed addition - only more affordable.

The NatureScape® roof system combines a durable, maintenance-free roof and an attractive ceiling in one structurally sound system.

Constructed of maintenance-free aluminum, with an expanded polystyrene core, it's designed to prevent leaks and engineered to meet local snow loads. NatureScape® roofs are available in studio or gable styles, with a variety of colors to choose from. It can accommodate shingles and other aesthetic roofing materials to match the existing roof on your home.

Optional skylights can be added, and the fan beam option lets you add overhead lighting without the mess of tangled wires.

*of the year.*

A  
FIRST-CLASS  
SUNROOM  
FROM AN  
INDUSTRY  
LEADER

Founded in 1981, Elite Aluminum Corporation has built its reputation on engineering new and innovative solutions that meet the needs of our customers, while investing in research and development to find new and better technologies to advance the industry as a whole. Elite products are crafted in our new high-tech manufacturing facility in Coconut Creek, Florida, using only top-grade materials and the latest equipment. Whatever the application, Elite is committed to excellence and innovation.
